

# Prisoner Transport Vehicles

Available space is often cramped, and airflow restricted.

Monitor temperature and humidity of compartments individually and know immediately if cooling units fail.

Receive tracking information and know if the vehicle has rolled over.

Send data directly to your favourite dashboard with no ongoing costs.

Use MODBUS, 4-20mA, or wireless Bluetooth temperature and humidity sensors.

Track location and speed with the inbuilt GPS.

Connect door switches directly to the ORB-X1 level inputs.

Send data directly to the server of your choice with no ongoing costs.

# Why Senquip?

## Connect to Anything

Interface to any engine, controller, or sensor, no matter the brand, physical interface, or protocol.

## Process Everything

Edge process measured data, create custom alerts, and control connected systems.

## Send Anywhere

Send data to the Senquip Portal or any other server. No ongoing costs, no lock in contracts.

## Trusted Everywhere

Designed for use in harsh industrial, mining, and agricultural environments.

## Senquip ORB

For extreme environments where IP ratings are essential and external antennas may be damaged. Typically mounted on poles, walls, and externally on machines

## Senquip QUAD

For harsh environments where external antennas are a benefit. Typically found in electrical cabinets, in operator cabs, and mounted externally on machines.

## Senquip Portal

The Senquip Portal is a secure cloud solution that offers a no-cost or low-cost device management and data hosting + analytics solution for Senquip devices.

TELEMETRY FOR HARSH ENVIRONMENTS
