Feral Animal Control

Feral animals are recognised as a threat to native fauna and flora. Traps are set to capture feral animals; these traps are often located in remote areas.

Know where your traps are and be able to determine the most productive locations.

Monitor the trap to know when the trigger has been activated.

Understand the climatic conditions at the location of the trap to ensure animals are treated humanely.

Use solar or AA batteries.

Inbuilt GPS provides trap location.

Use the internal temperature sensor to estimate conditions for trapped animals. Use an external MODBUS, or 4-20mA temperature and humidity sensor for accurate condition monitoring.

Receive online, SMS and email warnings and alarms.

Why Senquip?

Connect to Anything
Interface to any engine, controller, or sensor, no matter the brand, physical interface, or protocol.

Process Everything
Edge process measured data, create custom alerts, and control connected systems.

Send Anywhere
Send data to the Senquip Portal or any other server. No ongoing costs, no lock in contacts.

Trusted Everywhere
Designed for use in harsh industrial, mining, and agricultural environments.

Senquip ORB
For extreme environments where IP ratings are essential and external antennas may be damaged. Typically mounted on poles, walls, and externally on machines

Senquip QUAD
For harsh environments where external antennas are a benefit. Typically found in electrical cabinets, in operator cabs, and mounted externally on machines.

Senquip Portal
The Senquip Portal is a secure cloud solution that offers a no-cost or low-cost device management and data hosting + analytics solution for Senquip devices.

SENQUIP   **TELEMETRY FOR HARSH ENVIRONMENTS**
