

Integrated GPS tells you location of your vehicle.

Use the CAN Bus to measure current fuel level and monitor instantaneous fuel consumption.

Write a script to identify unusual changes in fuel level

Integrated Bluetooth reads personal identification tags and communicates with the fuel pump.

# Fuel Theft Prevention

Monitor where your vehicles have been and where substantial changes in fuel level have occurred.

Use Bluetooth tags to identify the person responsible for the vehicle.

Compare fuel consumption across vehicles in you fleet.

Only enable fuel delivery for vehicles that are authorised.

# Why Senquip?

## Connect to Anything

Interface to any engine, controller, or sensor, no matter the brand, physical interface, or protocol.

## Process Everything

Edge process measured data, create custom alerts, and control connected systems.

## Send Anywhere

Send data to the Senquip Portal or any other server. No ongoing costs, no lock in contracts.

## Trusted Everywhere

Designed for use in harsh industrial, mining, and agricultural environments.

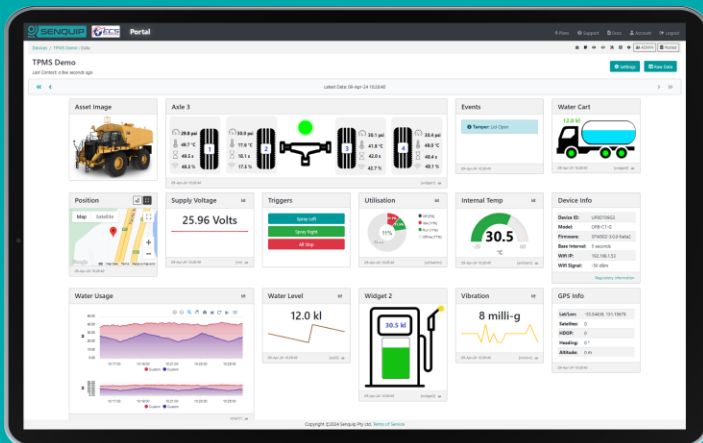

## Senquip ORB

For extreme environments where IP ratings are essential and external antennas may be damaged. Typically mounted on poles, walls, and externally on machines

## Senquip QUAD

For harsh environments where external antennas are a benefit. Typically found in electrical cabinets, in operator cabs, and mounted externally on machines.

## Senquip Portal

The Senquip Portal is a secure cloud solution that offers a no-cost or low-cost device management and data hosting + analytics solution for Senquip devices.

TELEMETRY FOR HARSH ENVIRONMENTS
